EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In line 9 of claim 36, please replace "sliazane" with

-- silazane --.

Allowable Subject Matter

Applicant has overcome all of the rejections by simply cancelling those claims and rewriting others that had been deemed to contain patentable subject matter as independent claims. Presently, claims 4, 6, 10, 11, and 33-36 are independent.

All but claims 10 and 11 require that the anti-soiling surface layer be derived from a silazane compound. Claims 4, 6, 10, and 11 relate to optical recording materials or preparation of the same whereas claims 33 to 36 disclose more general, but similarly constituted, articles of manufacture and their preparation.

The literature devoted to multilayered composite films comprising at least one layer derived from a silazane compounds is fairly limited. The most germane prior art was, for the most part, commonly assigned including two references used as a

foundation for rejection that are now overcome. A fair number of references disclose hard coats derived from polysilazane but a second silicon-based layer is not contemplated in any of these instances.

Claims 35 and 36 mention a silane compound bearing perfluoropolyether radicals as an alternative to silazanes in forming the anti-soiling layer. Takahashi et al., U.S. Patent Application Publication No. 204/0021966 describes a lens coated with a silica hard coat intermediate layer and a fluoroalkyl group-functionalized silane and silicon-free perfluoropolyether. The Examiner could not conceive of why one would have been motivated to replace this mixture of materials with a single silane bearing a perfluoropolyether chain. Indeed, to do so would appear to destroy the teachings of the reference.

There references cited herein and in earlier stages of prosecution represent the most relevant documents known. Because they fail to even render obvious the instant invention, claims 4, 6, 9-20, 23, 25-26, and 33-46 are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marc S. Zimmer whose telephone number is 571-272-1096. The examiner can normally be reached on Monday-Friday 8:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Randy Gulakowski can be reached on 571-272-1302. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
